California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

#### **Paul's Slide, State Route 1, Monterey County**

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- Continues with usual access schedule to local residents and deliveries.
- The targeted "public access" date is currently 07/17/17-07/20/17, dependent on roadway conditions and slide activity.

- Remains fully closed in both directions at Mud Creek due to continued slide activity. Delivery vehicles and local residents will need to use Nacimiento-Fergusson to exit south or to clear the access times at Paul's Slide. Local residents and delivery vehicles only; the only access to the public is accessing on Highway 1, using Nacimiento-Fergusson, will be to Gorda (PM 10) to the south, and to Limekiln State Park (PM 20.76) to the north.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

\*\*\* Windy and Very Dry East of the Cascade-Sierra Crest through Wednesday \*\*\*

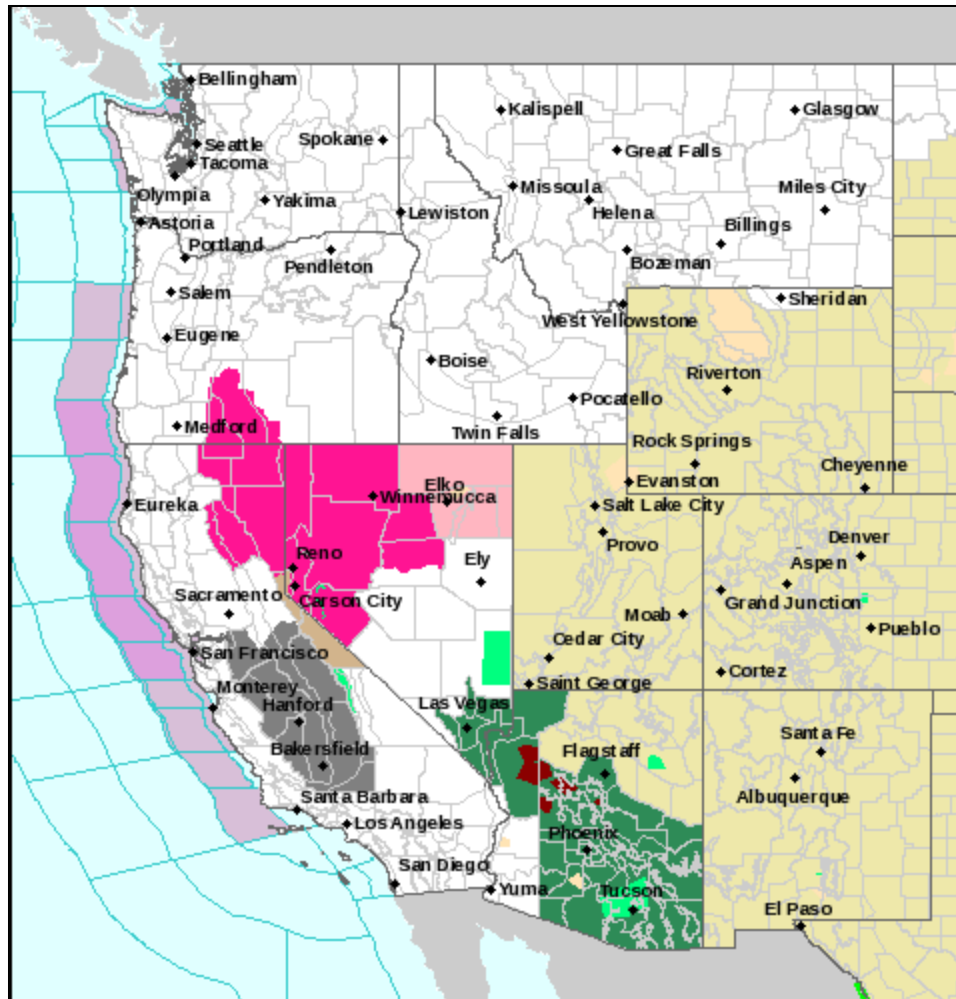

A deep low pressure area will be spinning in the eastern Gulf of Alaska through Wednesday. A trough will extend from the low down the west coast to Northern California. This pattern will produce a dry southwest flow pattern aloft over Northern California. Temperatures will be within a few degrees of. The marine layer will deepen and move farther inland each night, but above the marine layer the air mass will remain very dry. Poor overnight relative humidity (RH) recovery can be expected anywhere in the region outside of the marine layer and inland low spots. The main effect from this trough will be southwest winds gusting to 25-35 mph and single digit RH east of the Cascade-Sierra crest each afternoon through Wednesday.

Late in the week the trough will weaken, allowing temperatures to warm a bit and winds to diminish. Dry and warmer weather is also expected over the weekend as high pressure returns.

## **SOUTHERN CALIFORNIA**

Temperatures will remain around 5 degrees above normal today as high pressure sits over the Four Corners area. Maximum temperatures will be in the mid 80s to mid 90s across the mountains and mid 90s to 105 in the valleys. The high pressure will shift off to the east Tuesday bringing near normal temperatures to the area through this weekend. Minimum humidity will be mainly between 20% and 40% across Southern California through Thursday, otherwise minimum humidity will be mainly between 12% and 25% away from the coastal areas through this weekend. Isolated showers and thunderstorms will occur across Southern California this afternoon through Thursday afternoon, with most of the activity expected across the mountains and deserts east of I-15. Shower and thunderstorm activity may increase Tuesday afternoon through Wednesday afternoon as a weak disturbance moves across Northern Baja. Westerly winds of 15 to 25 mph with gusts to 40 mph will continue to surface across the wind prone desert areas each afternoon and evening through this weekend.
